

Dear guest,

We are pleased that you have chosen our enterprise, which has been awarded our national Ecolabel. With your decision you show that you also attach importance to a reasonable way of dealing with our bases of life. We have taken a pledge to comply with numerous stringent criteria and let us be checked by independent bodies.

The Austrian Ecolabel

Having obtained this award is an obvious sign of our committed efforts for the environment – but also our guests and the people working in our enterprise are particularly important to us. Together, we assume environmental and social responsibility by

- preferentially purchasing environmentally compatible and regional products,
- using energy and water reasonably,
- taking various measures to reduce CO₂-emissions,
- using renewable energy,
- avoiding waste and separating them,
- training and motivating our staff,
- supporting our regional economy,
- maintaining the natural diversity and the cultural heritage,
- developing offers for guests and local people,
- surveying the satisfaction of our guests and employees,
- continuously improving the (environmental) quality of our enterprise,
- helping guests to organise their holidays in a sustainable manner.

We would be happy if you, as our guest, supported our efforts and contributed actively to promoting healthy environments for ourselves and our children in that you

- close the windows, when the heating or the air conditioning system is on,
- turn off the light when you leave the room,
- do not leave the water running unnecessarily and use the economy button when flushing the toilet; please notify us in case of a leaking tap or toilet flush,
- towels on the floor means: please change,
- please separate your waste and put it in the designated containers,
- appreciate precious foods and help to minimize food waste,
- smoke only at places where this is permitted,
- preferably use public means of transportation and bicycles,
- protect fauna and flora during your trips,
- respect regional customs,
- preferably purchase regional, environmentally friendly and low-waste products.

Thank you very much for your support! Your ideas and suggestions for improvements are most welcome!
